Gurugram, India | +91 7355150894 | 1539sakshi@gmail.com | LinkedIn | GitHub

Skills

Languages: JavaScript (ES6+), TypeScript, OOJS, HTML5, CSS3, Sass/SCSS

Frontend: React.js, Next.js, React Native, React Hooks, React Router, Tailwind CSS, Bootstrap

State & Data: Redux, Redux Toolkit, Zustand, TanStack Query (React Query), Axios, REST APIs

Testing: Jest, React Testing Library, Cypress, Jasmine, Mocha

Build & Tooling: Webpack, Figma, Git, GitHub, NPM, Yarn, Chrome DevTools, Postman, JIRA

Experience

Software Developer II | Junglelee Games

July 2026 – Present

- Built the Ask AI feature across web and mobile with React.js, TypeScript and API integrations, delivering AI-powered in-product user assistance.
- Developed and enhanced features for the Sportsbet app and website using React.js, React Native, TypeScript and JavaScript, supporting betting experiences across sports, racing and gaming.
- Implemented the Block/Unblock feature with Ably for real-time live chat, enabling dynamic user access management and seamless support interactions.

Software Developer | Kigen

April 2023 – June 2026

- Built and maintained a React-based operations portal with dashboards, reusable components, and an end-to-end customer onboarding journey, reducing manual operational effort.
- Architected a generic, scalable UI system of reusable React components and composable layout patterns, cutting duplication and accelerating development of new portal features.
- Managed client state with Redux and server state with React Query, implementing caching and invalidation for reliable dashboard performance.
- Implemented role-based access control across the portal so users saw only the views and actions permitted by their role, and contributed to onboarding and authentication flows.
- Wrote unit and component tests with Jest, React Testing Library and Jasmine, and end-to-end suites with Cypress covering the portal's onboarding and dashboard flows.
- Cut bundle size 35% through code splitting, and improved dashboard performance with React Query caching and component refactoring, reducing technical debt alongside TypeScript best practices and code reviews.
- Integrated Sentry for real-time error monitoring and WebEngage for user analytics and event tracking across key portal workflows.

Projects

Form Builder | React.js, TypeScript, Redux Toolkit, Tailwind CSS

- Built a dynamic form builder with reusable templates, configurable fields, conditional logic, validation, response tracking and PDF export.
- Designed a normalized localStorage schema with id-keyed maps for O(1) lookups and responses stored as immutable snapshots, routed through a single swappable storage service with defensive reads.
- Engineered one reusable FieldRenderer component handling every field type, reused in a disabled fieldset for read-only response views.

Innogeeks Website | React.js, Django, AWS, SQL

- Engineered a responsive frontend in React.js integrated with a Django REST API backend.
- Created role-based access controls for visitors, members and administrators.

Education

KIET Group of Institutions, Ghaziabad

Bachelor of Technology in Computer Science and Information Technology, 8.0 CGPA

2023
